PURCHASE REQUISITION

OVERVIEW

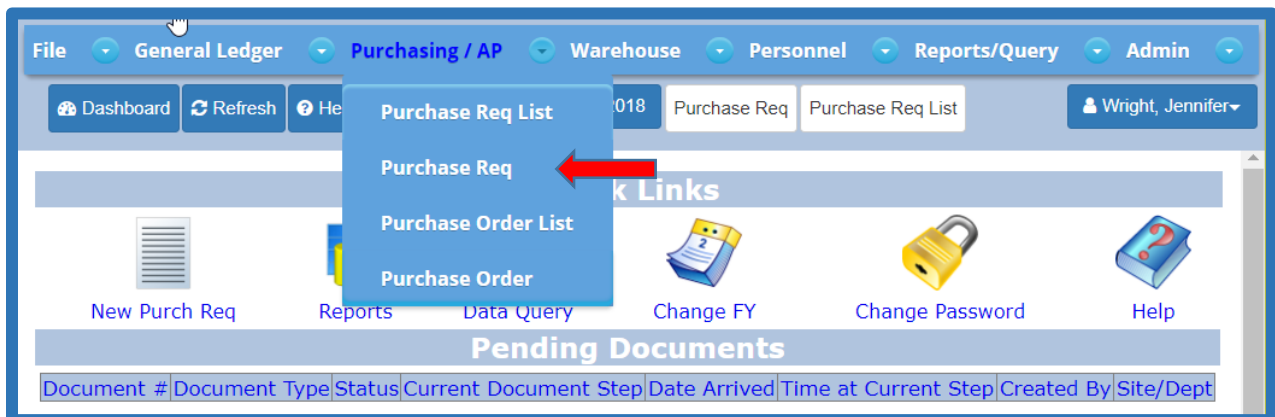

The Smartetools Purchase Requisition is a digital form that will replace the existing procedure currently used by the district. The new digital form will allow you to electronically create, route and approve all requisitions, as well as, perform additional functions such as adding notes, attaching files and tracking the requisition movement, etc.

MAIN MENU

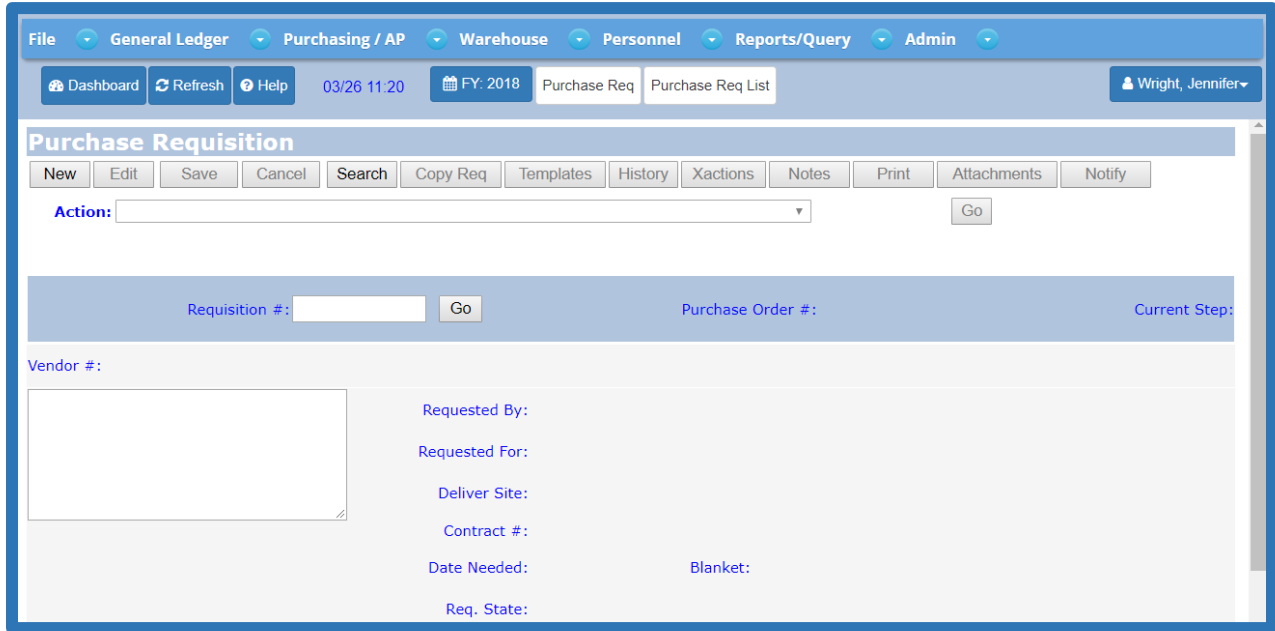

The **Main Menu** displays the functional areas for which you are authorized. The menu bar below shows File, General Ledger, Purchasing / AP, Warehouse, Personnel, Reports/Query, and Admin. To access the items within each of these areas, click on the desired area.

The **Purchasing / AP** menu will allow you to access different areas within the purchasing module. Under the **Purchasing / AP** tab click on **Purchase Req**.

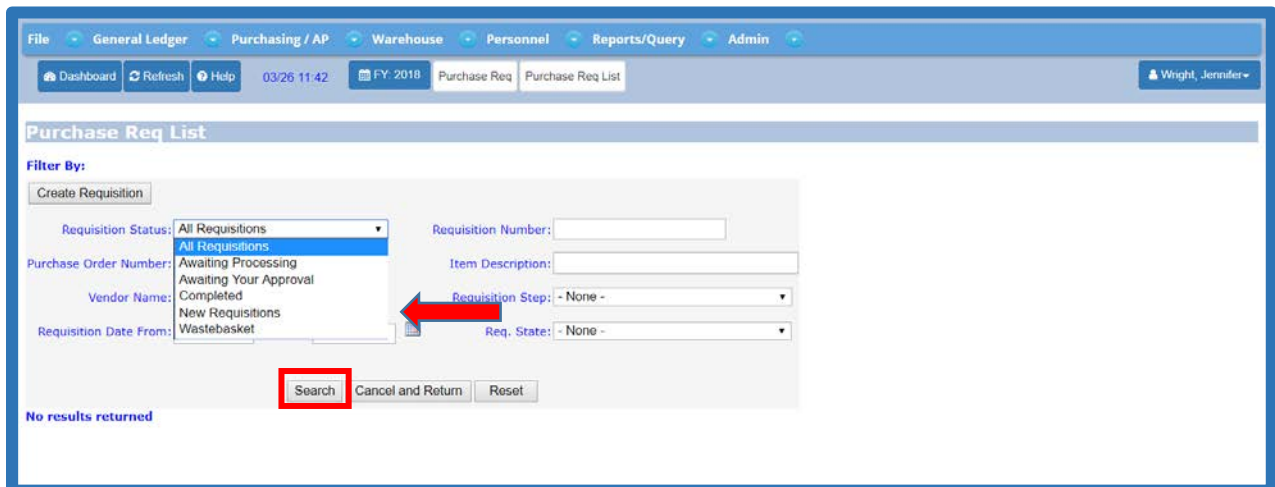

This will open the Purchase Requisition screen.

To find a list of Purchase Requisitions use the **Search** button. This will open a search screen.

When you click the **Requisition Status** dropdown list, you will see other possible statuses to help you refine your requisition search. If you select **Completed**, all your purchase requisitions that have been processed within the fiscal year will display. The **New Requisitions** status will list the purchase requisitions that you have entered but have not yet routed.

Use the **Requisition Date From/To** area to display requisitions within a certain date range. You may also search for requisitions by **Requisition Number** or **Item Description**. If you search for a requisition using the **Requisition Step** dropdown list, all requisitions that are currently at the step you have chosen will display. Note that this field, along with the **Req. State** field, are district defined fields. **Req. State** lists conditions that need to be completed before a requisition can be processed.

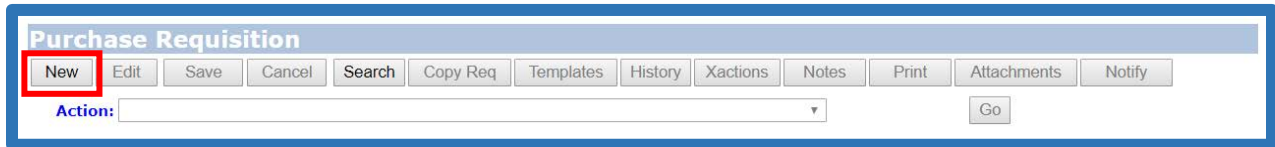

Click the **Reset** button to clear your search criteria and begin a new search.

To work with a requisition, click the **Select** button next to the Req Number. This will display the requisition and allow you to edit, route, print, and perform other functions related to the requisition. You can also create a new purchase requisition.

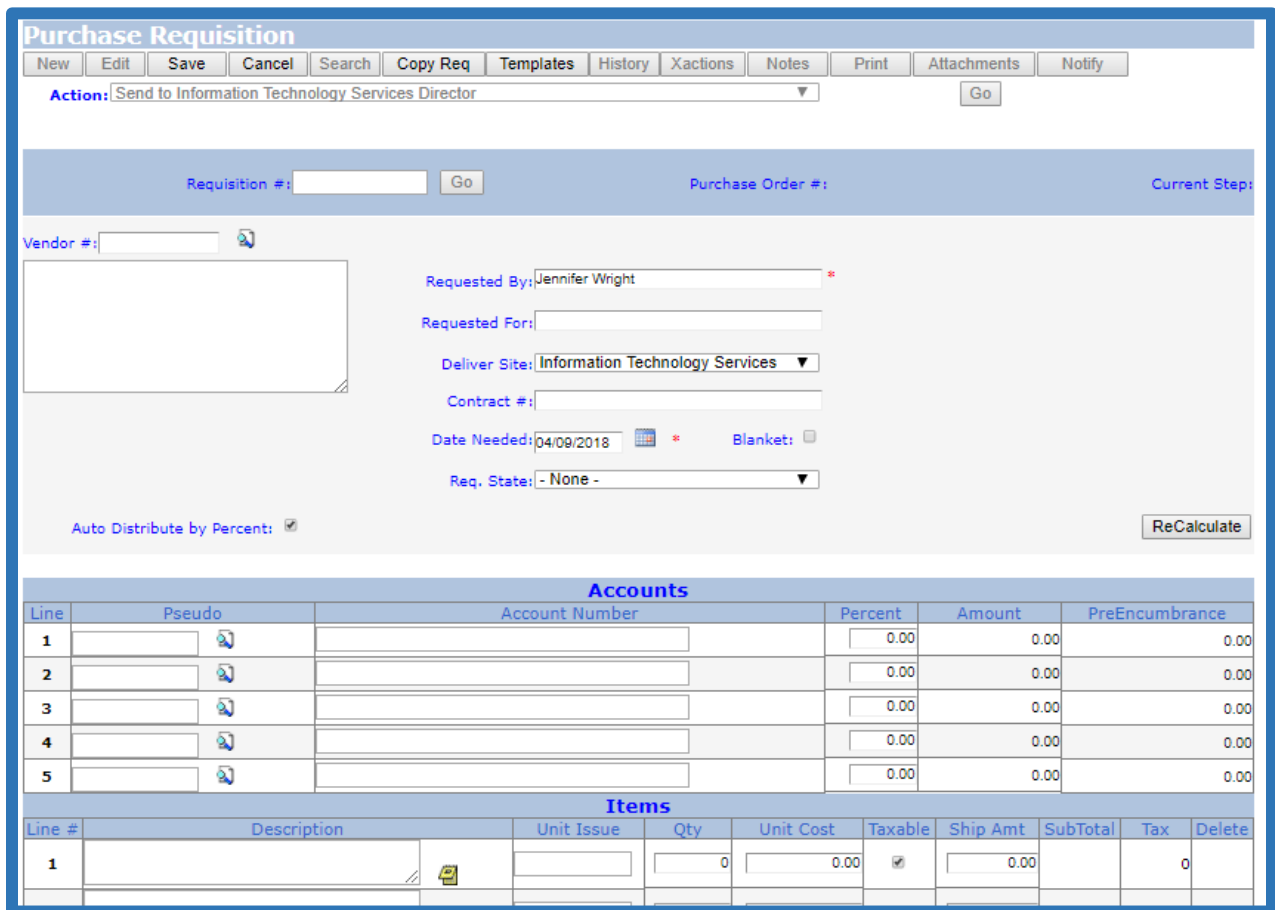

From the Purchase Requisition screen, you can also search for another requisition, display the routing history, view account transactions related to this requisition, and attach notes and attachments to the requisition. To route a requisition, select a route from the **Action** dropdown list, then click the **Go** button. Note if the account number on a requisition is displayed in **RED** this is a visual indicator that the account does not have sufficient funds for the requisition.

CREATE A PURCHASE REQUISITION

To create a new purchase requisition, select the **New** button. This will present a blank requisition page.

Begin by verifying the **Requested By** line and providing **Requested For** information, if needed. Select the **Deliver Site** from the dropdown list. If your user profile only allows access to your site, then only one site will be available for selection. Enter a **Contract Number** if this requisition is to reference a contract. The **Date Needed** will default to 14 days from the date the requisition is created. Enter a new **Date Needed** if it is different than the default date.

The information required to save a requisition is **Requested By**, **Date Needed**, at least one **Account Number**, and at least one **Line Item**.

When entering accounts, the cost of the requisition can be allocated by percent by leaving the **Auto Distribute by Percent** check box checked. To use a different method of cost allocation, uncheck this box. Allocation of the cost of the requisition will be discussed later in this document.

VENDOR SEARCH

If you would like to select a vendor, you can activate the Vendor Search function by clicking the **Vendor Search** icon that looks like a magnifying glass next to the Vendor # field.

To select a vendor from the list, click the **Select** button next to the desired vendor. This will close the Vendor Search page and copy the vendor information into the requisition. If your district has defined vendor categories and assigned vendors to these categories, you can also search for a vendor by category.

A vendor name is not required to submit a purchase requisition. If a desired vendor is not found, click on the **Suggest Vendor** button and enter the information of the vendor you wish to suggest. This allows vendor information to be submitted with a requisition that may not be in the vendor file.

Once you have filled in the suggested vendor information, click the **Save Suggest** button and the information will be copied into the purchase requisition.

At this point, information at the top of the requisition is complete. The next step is to assign the account(s) that will be used to pay for the requisitioned items. Depending on the configuration selected by the district, you may enter more than one account or be restricted to a single account on a requisition.

ACCOUNT SEARCH

The center portion of the Purchase Requisition page contains the account information. To assign an account number to the requisition enter the account number or do an Account Number Search by clicking on the icon that looks like a magnifying glass next to the Pseudo line.

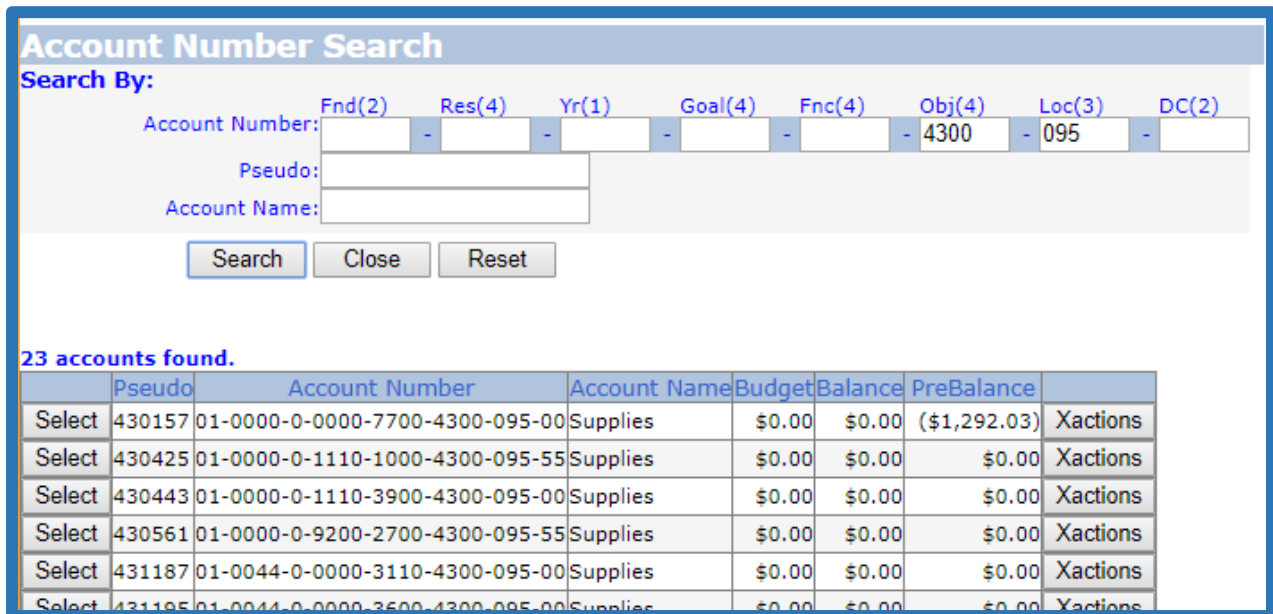

The Account Number Search page allows you to search for and select an account number. Depending on your user profile, you may be limited to the account numbers you can access.

The purchase requisition page allows for five accounts initially. To assign more than five accounts to a requisition, save the requisition and then click the **Edit** button. The requisition will show the five original accounts and five more blank account lines that may be used for additional accounts.

There are three methods to distribute line item amounts to accounts. If the **Auto Distribute by Percent** box is checked then you must enter a percentage for each account number to compute the amount to be allocated to each account. This is the percentage of the total cost of the requisition as determined when all line items have been entered. When you click the **ReCalculate** button, the line item amounts will be totaled and distributed into the **Amount** field on the **Account Number** line.

2			0	0	0.00
3			0	0	0.00
4			0	0	0.00
5			0	0	0.00

To allocate the cost of the requisition without using the percent method, uncheck the **Auto Distribute by Percent** box. You can then enter the amount for each account in the account **Amount** field. Using this method, the amounts allocated to the accounts must be equal to the *total* amount of all the line items. The allocation must be exact.

2		Paper, 8 1/2 x 11 white, 20#	case	1	35.00	☑	0.00	35.00	2.62	

A third method for allocating the cost of line items to the accounts allows the assignment of each line item to an account line. Choose the account line number from the **Acct** dropdown list. When using the line item account number assignment method, all line items must be assigned to account lines.

Items

When you click the **Recalculate** button, the system will calculate the line item costs and distribute that amount into the **Amount** area of the corresponding account number.

ENTERING ITEMS

The last section of the Purchase Requisition page is used to enter the items requested.

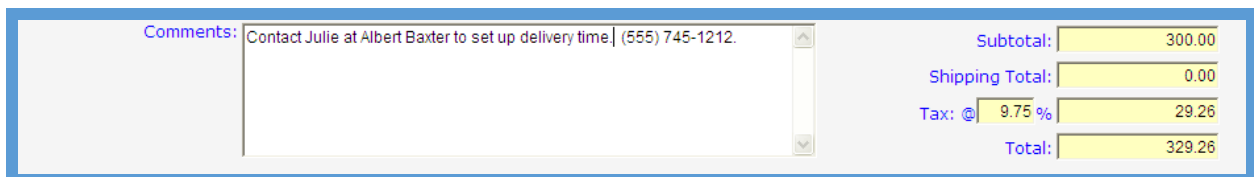

Enter a **Description** of the item, **Unit of Issue**, **Quantity** and **Unit Cost**. If the item is known to be taxable, then leave the **Taxable** box checked. Uncheck the Taxable box if the item is not taxable. In order to enter an expanded description for a line item, click the notepad icon to open the **Line Item Description** window. This will display a page allowing free formatting of the description. If the description to be entered is short, it can be entered without having to use the expanded description entry page.

The image shows a window titled "Line Item Description:". Inside the window is a text area containing the text "Laser Printer, large capacity, model 4300". At the bottom of the window are two buttons: "Save" and "Close".

Click the **Save** button to close the expanded description entry page and copy the item description to the requisition.

Once the line items have been entered, you can enter comments in the **Comments** area. These are general comments that will display with the requisition.

The image shows a section with a "Comments:" label and a text area containing "Contact Julie at Albert Baxter to set up delivery time | (555) 745-1212". To the right of the text area is a summary table:

Subtotal:	300.00
Shipping Total:	0.00
Tax: @ 9.75 %	29.26
Total:	329.26

Once the requisition is complete, it can be saved by clicking the **Save** button at the top of the requisition. If any errors are found, you will be notified and asked to correct the problem. You can cancel the creation of (or edit) a requisition by clicking the **Cancel** button.

Possible errors within the requisition include:

- No account number was entered.
- More than one account was used when multiple accounts have been disabled.
- The accounts do not conform to the multiple accounts constraint defined by the district.
- A line item exists that has a quantity but no unit cost.
- A line item exists that has a unit cost but no quantity.
- The Auto Distribute by Percent has been unchecked and there is a problem with the account amount distribution.

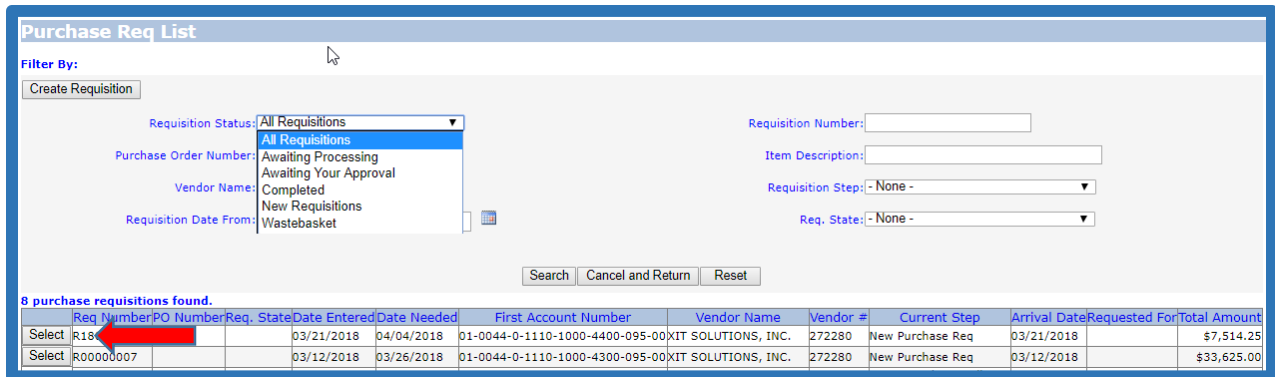

If any of these errors occur, the error will have to be corrected before the requisition can be saved.

Once a requisition is saved, it will be displayed with all of the information. The menu at the top of the requisition will now have many more options.

EDIT A REQUISITION

REQUISITION SEARCH

To edit a requisition, use the Requisition Search function to find the requisition you wish to edit. To activate the search function, click the **Search** button on the Purch Req or Purchase Req List menu. The Purchase Requisition Search page will be displayed. Enter the criteria you wish to use to search for a requisition.

To select a requisition, click on the **Select** button next to the desired requisition. This will close the search page and display the requisition.

Assuming you have access to edit the requisition, click the **Edit** button at the top of the page. The requisition edit page will be displayed allowing you to change the information on the requisition. The edit page resembles and allows the same types of entries as the creation page; therefore, when editing a requisition, you should follow the same procedures as when you created the requisition. Once you have completed your changes, click the **Save** button. You can cancel your changes by clicking the **Cancel** button.

Once a requisition is displayed, refer to the menu at the top of the page for actions that are available for the requisition. If the requisition has been routed, the **Edit** button may be missing. A requisition can only be edited if it is at a location/step to which you have access. Once it has been routed and is in the approval process, the originator may no longer have access to edit.

Refer to the **Current Step** field at the top of the requisition to see where the requisition is currently located in the approval process.

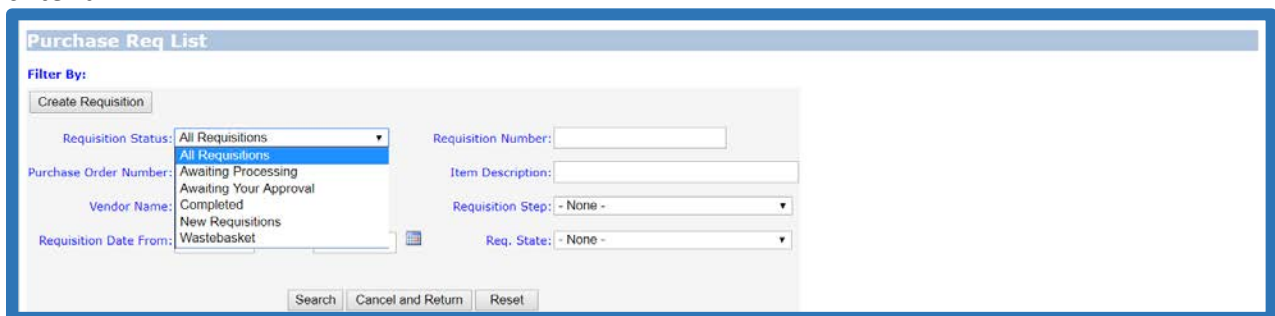

COPYING A REQUISITION

You can create a new purchase requisition by copying a previously created purchase requisition into the New Purchase Req screen. Click **New** to open a blank purchase requisition screen then click the **Copy Req** button.

From the Purchase Req search screen, enter the criteria you wish to use to search for a requisition. If you need to change your filter criteria, click the **Reset** button and enter new search criteria.

TEMPLATES

You can create a new purchase requisition by using a preset format in **Templates**. Click **New** to open a blank purchase requisition screen and then click the **Templates** button.

Select the **Search** button and a list of all vendors and their forms will appear. You can also enter any part of a vendor in the **Template Name** or **Vendor Name** to search for a specific template.

Click to select the Template Name. The vendor and item descriptions will auto-fill into the requisition. Update the quantity amounts and select **ReCalculate** to check for error messages. When order entry is complete, select **Save** and then **Go** to route the requisition.

ROUTE A REQUISITION

Once a purchase requisition has been saved and is complete, it is ready to be routed to the appropriate departments/personnel for approval, eventually arriving at its final destination, usually the Purchasing Department.

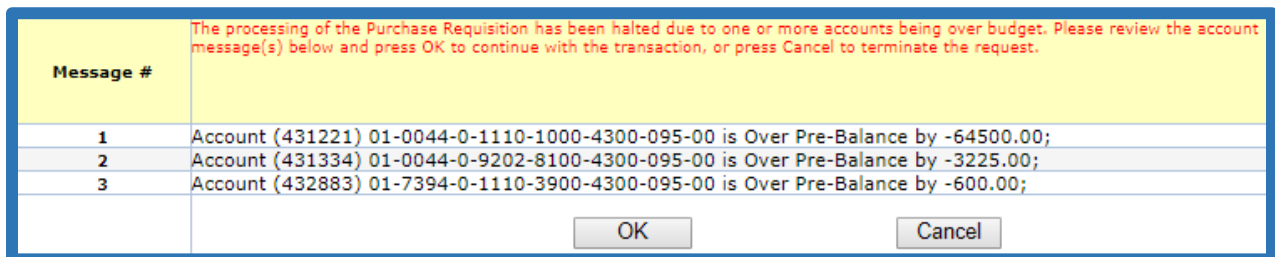

To route a requisition, click the dropdown arrow at the **Action** field and a list of possible locations/steps to which the requisition can be routed will display. This list is dependent on the current location/step of the document and is district defined.

The screenshot shows the 'Purchase Requisition' window with a menu bar containing: New, Edit, Save, Cancel, Search, Copy Req, Templates, History, Xactions, Notes(0), Print, Attachments(0), and Notify. Below the menu bar, the 'Action:' field is open, displaying a dropdown list with three options: 'Send to Magnet Programs Approval' (selected), 'Send to Magnet Programs Approval', and 'Return Document to New Purchase Req'. A 'Go' button is visible to the right of the dropdown.

Select a route and click the **Go** button. Due to account number and spending restrictions, you may receive a message stating that the route is not valid. This occurs when an account number on the requisition has a restriction that limits routing to specific routes.

When requisitions are routed, the budget(s) may be checked and a pre-encumbrance transaction may be created. If any of the accounts on the requisition have an insufficient budget for the amount on the requisition, you will see a message such as the one shown below.

The screenshot shows a dialog box with a yellow background and a red border. The message text reads: "The processing of the Purchase Requisition has been halted due to one or more accounts being over budget. Please review the account message(s) below and press OK to continue with the transaction, or press Cancel to terminate the request." Below the message is a table with three rows of account information:

Message #	Account (431221) 01-0044-0-1110-1000-4300-095-00 is Over Pre-Balance by -64500.00;
1	Account (431221) 01-0044-0-1110-1000-4300-095-00 is Over Pre-Balance by -64500.00;

3	Account (432883) 01-7394-0-1110-3900-4300-095-00 is Over Pre-Balance by -600.00;

At the bottom of the dialog box are two buttons: 'OK' and 'Cancel'.

The **Cancel** button may be the only button available on this page which means that the requisition cannot be routed until this over-budget condition is corrected. If your district allows over-budget conditions, then an **OK** button will appear allowing the requisition to be routed.

To view the routing history and approvals for a requisition, click the **History** button. This will display a page that shows the complete routing history of the requisition.

PRINT A PURCHASE REQUISITION

The purpose of an electronic requisition system is to reduce the amount of paper that flows through the district. However, many times it is desirable to print a copy of a requisition for your records. To print a copy of a requisition, first select the requisition using the Requisition Search function. Once selected, click the **Print** button on the Menu bar.

The print function will display the requisition page formatted for printing. You can use your browser's print function to print this page on your printer.

ATTACHMENTS

Lastly, you may need to attach a vendor quote or an item photo to a requisition. To begin, click the **Attachments** button on the menu bar to open the Attachments screen. Within the Attachments screen, you can browse your computer for PDF files, pictures, or office documents. To attach these to a requisition, select the appropriate file or photo and click **Attach File**. A list of attachments and their file description will be compiled within this screen and the number of attachments pertaining to the requisition will appear next to the **Attachments** button on the purchase requisition screen menu.
